Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2829

1. Applicant's election of species of figure 8 in Paper No. 5 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. It appears that claims 16-18 do not read on elected species of figure 8, therefore these claims are withdrawn from consideration.
3. Claims 16-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.
4. The abstract of the disclosure is objected to because leagal phraseology such as "The present invention" is used. Correction is required. See MPEP § 608.01(b).
5. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is unclear what "a prober" and "means for transmitting energy" represent. Furthermore, it is also unclear what does a prober includes.

In claim 3, it is unclear what "an optical sensor" represents. Is it shown in elected species of figure 8?

In claim 5, it is unclear what "means for data communication" represents. Is it shown in any of drawings?

In claim 8, it is unclear what “an optical sensor” represents. Is it shown in elected species of figure 8?

In claim 13, it is unclear what “means for measuring a distance”, “a prober”, “computer means”, “means for electrically signaling in response...” and “means for transmitting energy to said probe card...” represent. Are they shown in elected species of figure 8

In claim 15, it is unclear what “a temperature sensor” represents. Is it shown in elected species of figure 8.

The dependent claims not specifically address share the same indefiniteness as they depend from rejected base claims.

6. Claims 1-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It appears that the apparatus of figure 8 does not have support for “means for transmitting energy to said probe card to selectively deflect said probe card to control the geometric planarity of said probe card”.

7. Since claims are indefinite, no art has been applied to these instant claims 1-15.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kuji et al (Pat # 5,640,101) disclose probe system and probe method.

Iino et al (pat # 6,140,828) disclose prober and probe method.
